# Free the Qi and Blood

## Treatments for 10 Disorders

### Multiple Uses of Xiao Yao San

Xiao Yao San originates from the Tai Ping Hui Min He Ji Ju Fang in the Song dynasty. Xiao Yao translates to the words relax and smooth. San translates to the word powder. It regulates Liver Qi and strengthens the Spleen Qi and Liver Blood. Xiao Yao San is used for Liver Qi stagnation or Liver and Spleen and Stomach not harmonizing and underlying Spleen Qi deficiency and Liver Blood deficiency.

#### Indications:

Excessive emotionality, depression, bipolar disorder, irregular menstruation, PMS, irregular menstruation, excessive uterine bleeding, loose stool, upset stomach, bloating, fatigue, dark or pale tongue with teeth-marked tongue with a moist coating, wiry or wiry and weak pulse.

#### Ingredients:

<b>Chai Hu</b>	<b>Radix Bupleuri</b>	3-6g
<b>Bai Shao</b>	<b>Radix Peoniae Lactiflorae</b>	3-15g
<b>Bo He</b>	<b>Mentha Haplocalyx</b>	3-6g
<b>Dang Gui</b>	<b>Radix Angelicae Sinensis</b>	3-12g
<b>Bai Zhu</b>	<b>Rhizoma Atractylodis Macrocephalae</b>	3-12g
<b>Fu Ling</b>	<b>Sclerotium Poriae Cocco</b>	3-30g
<b>Sheng Jiang</b>	<b>Zingiberis Officinalis Rechen, Rhizoma</b>	3-12g
<b>Gan Cao</b>	<b>Radix Glycyrrhizae Uralensis</b>	3-6g

The Chief ingredients, **Chai Hu** and **Bai Shao**, regulate Liver Qi. **Chai Hu** raises the Qi upwards and moves it to the left and right sides of the body. **Bai Shao** nourishes the blood, astringes the Yin and harmonizes the Ying and Wei. **Chai Hu** emphasizes its moving and rising properties and **Bai Shao** emphasizes its astringent property. As paired herbs, they harmonize each other.

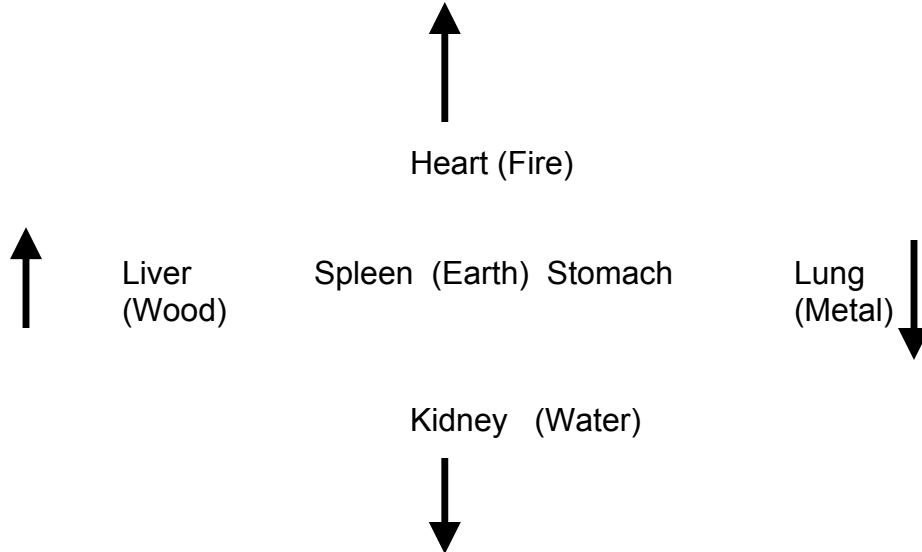

The assistants are **Dang Gui**, **Bai Zhu** and **Fu Ling**. **Dang Gui** nourishes the blood and promotes blood circulation. **Bai Zhu** and **Fu Ling** dry and drain dampness in the Middle Jiao. **Bai Zhu** dries dampness and **Fu Ling** promotes urination and drains dampness thus maintaining a dry environment for the Spleen.

The adjutant (also translated as assistant) herbs are **Sheng Jiang** and **Bo He**. **Sheng Jiang** is acrid and warm to assist Chai Hu and Bai Zhu to regulate Qi, dry dampness and descend the Stomach Q. **Bo He** is acrid and cool to assist the function of Chai Hu to smooth the Liver Qi on a lighter (i.e. surface) level and reduce irritation. Bo He, Chai Hu, and Bai Shao function as a combination to work on surface, middle, and deeper levels respectively. Bo He works on the surface level (its function is to release the surface), Chai Hu works on the Shao Yang level (it enters the GB Lesser Yang channel) and Bai Shao works on the deeper level of Jue Yin to regulate and smooth Liver Qi and eliminate irritability.

The messenger, **Gan Cao**, with its sweet taste, slows and harmonizes the other ingredients for both upward and downward-moving properties and strengthening Qi.

## The Movement of Qi

In terms of the five element Qi flow in the body, Heart Qi tends to move upwards, Liver Qi tends to move upwards as well as to the left and right, Spleen Qi moves upwards, Stomach Qi moves downwards, Lung Qi needs to be open and move downwards, and Kidney Qi needs to be stable.

**Chai Hu** and **Bo He** move Liver Qi upwards to regulate Liver Qi.

**Bai Shao** calms the Liver and Kidney Qi with a downward moving property.

**Bai Zhu** dries the Spleen and promotes the Spleen Qi flowing upwards.

**Fu Ling** drains dampness thus stabilizing the Stomach, Lung and Kidney Qi and also decreases dampness in the Middle Jiao thus moving the Spleen Qi upwards.

**Gan Cao** stabilizes Spleen, Stomach, Lung and Kidney Qi.

This formula is a combination of herbs that move the Qi upwards and downwards:

- **Chai Hu**, **Bo He** are cool and tend to raise and regulate the Liver Qi upwards.
- **Bai Zhu** and **Sheng Jiang** are acrid and warm and tend to move upwards the flow of Spleen Qi and downwards the Stomach Qi.
- **Dang Gui** warms up and promotes Liver and Heart Qi upwards.
- **Fu Ling** and **Gan Cao** are stabilizing and move downwards the Spleen and Kidney Qi.

These upward and downward functions balance the Yin and Yang of the formula and treat patients with simultaneous Liver Qi stagnation with Spleen Qi deficiency conditions. Adjustments can be made to the formula to balance excess and deficiency

syndromes. For example, if a patient has Liver Yang Rising high blood pressure and Spleen Qi deficiency diarrhea, one may need to increase the dosage of **Bai Shao** and **Fu Ling** and decrease the dosage of **Dang Gui** and **Chai Hu**. If a patient has predominantly Liver Qi stagnation with depression, one may need to increase the dosage of **Chai Hu**, **Bao He**, **Dang Gui** and **Sheng Jiang**.

Cautions: Use caution if the patient has heat pathogens. A high dosage of Chai Hu may lead to Liver Yang Rising.

### How to Use This Course Material

**The following sections present formula modifications for Xiao Yao San. Use the formula recommendations and single herb combinations to modify the base formula of Xiao Yao San to address each condition reviewed.**

## 1. Emotional disorders

In the five elements the Liver is wood. Its character is likened to the upward, left and right movements of a tree that moves upward, left and right. Heart is fire and flames upwards and is strong in character. The Heart fire and Liver wood combine to effect the emotions. The wood is the fire Yin. The fire can burn out the Yin of the wood. The Heart fire is Shen shows outwardly and is therefore apparent. The Liver wood is decision making and it said to be hiding. An example from analogy, the Shen of Heart is the president of U.S.A. The Liver is C.I.A. The flame of Shen fire is supported by the wood of Liver Yin decisions. The Lung is the metal character that has strong will and is stubborn as assistant to the Liver regarding decision making. The Qi of metal moves downwards to balance the Liver and Heart Qi upward nature. Kidney confidence is water that has a stable character to control the wood fire downwards. The Spleen and Stomach are the center earth and act as will. The Spleen raises the Qi upwards and Stomach downwards which act to balance movement.

Xiao Yao San uses Chai Hu to smooth Liver Qi upwards, left and right. Bai Shao astringes the Liver and harmonizes the Liver, Spleen, Stomach and Lung Qi upward and downward motions. Bo He is light weight (functioning towards the surface) to assist to flow of the Qi. Bai Zhu and Sheng Jiang assist the Spleen Qi upwards and Stomach Qi downwards. Gan Cao harmonizes the upward and downward motion and stabilizes the Kidney.

### Indications:
